

### Info Cubic Announces 99.9% Accuracy Objective!

As an ISO certified company, Info Cubic is always looking to improve on the service we provide our clients. In light of this, our accuracy objective is increasing this year from 99.8% to 99.9%!

### Current Employers - Verify or Not to Verify

The new year is a great time to review and update your organization's application and policies.

It is important to remember that verifying current employment information can jeopardize a potential candidate's current employment status. Best practice suggests this not be done without the expressed *written consent* from an applicant on their employment application, *in conjunction with* the standard authorization for release of information.

Part of this is obtaining a signed release form from your applicant with specific language regarding contacting past or *present* employers. Info Cubic's standard release has this wording and is available under our resources tab at [www.infocubic.com](http://www.infocubic.com).

If you are unsure, Info Cubic strongly recommends you contact your legal counsel directly about policies and practices regarding employment screening. It is not the intention of Info Cubic to give legal advice.

### 9th Annual CHRA Conference

For the third year in a row Info Cubic was a vendor at the Colorado Human Resources Association's annual conference held last Friday, January 20<sup>th</sup>, here in Denver. Hundreds of HR professionals came to attend presentations, network, expand their knowledge, and mingle with local HR related vendors.

The booth was manned by VP, Dan Mayer, Sales Consultant, Beth Brown, and Implementation Manager, Laurie Stapleton. This conference has become one of

our favorites to attend, not only because of the great turnout, but because Info Cubic is able to put a name to the face with our local clients, and develop local relationships.

Though Info Cubic has not only national, but international capabilities, we still believe in keeping a strong presence in our state and local communities. You can bet we will be there again next year.
